INVESTIGATION CARD

Take a hike!! Explore and investigate a trail or path near you for clues to identify animals and vegetation. Use the **magnifying glass** and **animal track sheet** to find animal tracks along the path. Using the **journal** included in the backpack, make a sound map! Mark an X in the middle of the page that represents you. Be still, stay in one place, and listen to the sounds around you. Where are they? What would the sounds look like if they had a shape? Are they high or low? Natural or manmade? Draw what you hear and be sure to label your map with the Location, Date, and Time. Did you hear birds? Try to find a bird using the **binoculars**! Scan the QR code for a fun Bingo hike!
